

## Rack Monitoring LCD Display Unit

The Rack Monitoring LCD Display Unit connects to the Power-Hawk<sup>2</sup> and Hawk-i<sup>2</sup> devices to display sensor and power strip information in an accessible and easily viewable format, externally, to a cabinet or rack.

### Key Features

- **Gathers monitoring information from the rack or cabinet**
- **Displays temperature, humidity, Voltage, Amps, kWh**  
View all information collected by connected devices.
- **Cycle through all sensor information**  
Automatic scroll or use scroll buttons.
- **Provides network configuration**  
e.g. IP address, subnet mask & default gateway.
- **Displays firmware version**
- **No network connection required**  
Connects directly via RS232.
- **2 versions available:**  
Factory fit (LCD display module + RS232 cable).  
Retro fit (LCD display module + RS232 cable + metal case with fixings).
